

MODEL. PILETURNER 104L-10 / 104L-17

TECHINCAL DATA:

Capacity.	MAX.	1000kg
High Capacity Min.		1300/1700mm
High Capacity Max		320mm
Platform dim.		1230*850mm
Machine width.	1510mm (FL1300 / 1510mm (FL1700)	
Machine length.	1965mm (FL1300 / 2510mm (FL1700)	
Machine high.	1900mm (FL1300 / 2150mm (FL1700)	
Machine Weight.		700kg / 900kg
Operation.	Manual operated by bush button	
Cycle time.	Approx. 15-20 pallets/hour	
Voltage.	400V - 3 facers + N + PE	

Samzon Pile-turner 104L pile-turner is a stationary machine used for changing the pallet under a product. This model is often used in the paper-industry. A major advantage with this machine is that the platforms can close-down to 320mm, which means the Samzon Pile-turner can handle very low products. Samzon Pile-turner closes around the product with platforms, tilts back by 90 degrees, the tower is released and is rotated manually 180 degrees and once again locked. The bottom platform is then lowered back down, the platforms open, and the products has been placed on a new pallet. The pallet is fed into the machine using a pallet truck or pallet jack. The pallet turner can be delivered with a variety of extra equipment and surface treatments.
