

MODEL. PALLET-TURNER S-TURNER FL2000-14 / FL2400-14

TECHINCAL DATA:

Capacity.	MAX.	1500kg
High Capacity MAX.		2000/2400mm
High Capacity MIN.		500mm
Platform dim.		1200*1000mm
Machine width.	1800mm (FL2000 / 2000mm (FL2400)	
Machine length.	2200mm (FL2000 / 2400mm (FL2400)	
Machine high.	2800mm (FL2000 / 3200mm (FL2400)	
Machine Weight.		1600kg / 1800kg
Operation.	Manual operated by bush button / auto by HMI screen	
Cycle time.	Approx. 20-25 pallets/hour	
Voltage.	400V - 3 facers + N + PE	

Samzon Pallet-inverter FL is a stationary pallet turner machine that runs to floor-level and is used to change pallets or for removing paper spacer or freezer spacer.

The pallet is fed into the machine using a pallet truck or pallet jack, as the machine runs to floor-level. The machine can either rotate 90-degrees or 180-degrees depending on your needs. To remove paper spacer or freezer spacer, the machine is rotated from 0 to 90-degrees, pressure from the platforms is alleviated to allow for removal of spacers.

Changing pallets, either because of a defect pallet or swapping it to a plastic pallet, the new pallet is placed on top of the product, the platforms press down on the product, rotate 180-degrees, and the product is now standing on its new pallet. This does require manual pallet lifting, to place the new pallet on top - to avoid manual lifts a different type of pallet-inverter is recommended.

The pallet turner can be delivered with a variety of extra equipment and surface treatments.
