

SAMZON® SD-800 Fully automatic stacking and destacking

Insert or remove the pallets using a hand pallet truck, electric stacker, or a forklift truck. SAMZON® SD-800 detects the pallets via photo sensors after which they are automatically stacked or destacked one by one at floor level.

When selecting destacking, a stack of no more than 15 or 25 pallets will be inserted in the SAMZON® SD-800, after which the pallets are automatically destacked one by one. When selecting stacking, the pallets are inserted one by one, after which the pallets are automatically stacked to no more than 15 or 25 pallets.

SAMZON® SD-800 is only operated manually using the touch panel to change between stacking and destacking.

The SAMZON® SD-800 can handle all 4-way pallets in wood, plastic, and metal no matter the length, width or height.

We can customise the SAMZON® SD-800 to match exactly the pallet size you use.

Your benefits with SAMZON SD-800®

- > Space saving and a tidy workplace
- > Optimised pallet flow
- > Improved work environment
- > Reduced pallet costs
- > Increased efficiency
- > No manual pallet handling
- > Less absence due to illness
- > Reduced time spent per pallet
- > Fewer back injuries, jammed fingers, and feet
- > Less truck driving
- > "Plug and Play" solution
